Integrate with transport partners

You select who you work with – the transport partners you choose will be set up on your account.

Make wise transport decisions, instantly

Compare the price lists, delivery times and transport conditions of different carriers. Ask for new offers, choose a partner and place the order. Track expected delivery times, transport history, generate reports and more.

Notify key people

Notifications keep your purchase team, sales department and warehouse informed about the movement of goods. Everyone has an overview of the shipments that interest them. Notifications about key events are also sent by email. Automatic notifications can be set up for customers and vendors. No matter who the carrier is, customers will always receive shipment information and a tracking link.

Shipping orders from Business Central directly to the carrier

Business Central can be connected to Cargoson using an API. The integration of Business Central and Cargoson allows you to send freight shipping orders based on the sales orders created in the ERP software to the Cargoson online environment.

Sending a transport order

Before sending the transport order, Business Central checks that all the required fields are filled on the sales order and in the Cargoson Order Lines table.

When the transport order is successfully sent to Cargoson, the API returns the order number from Cargoson, which is stored in the sales order field in Business Central.
