Data warehouse business intelligence solution for Microsoft Dynamics ERP software

Supported business management software

- Business Central
- Dynamics NAV
- Finance
- Dynamics AX

What is the Dynamics 365 data warehouse

BI4Dynamics? BI4Dynamics is an automated data warehouse solution for Microsoft's ERP software.

It is a data warehouse solution that can be set up for a business in a matter of days, regardless of the size, industry or complexity of the business. BI4Dynamics supports all versions and implementations of Microsoft Dynamics, both with cloud and on-premises infrastructure. The solution provides Power BI and Excel-based reporting as output.

Data warehouse as a foundation

Read more in the articles [Data warehouse as a foundation for business analysis](#) and [Three-layer business intelligence solution](#). BCS Itera's extensive experience has shown that the lack of data warehousing will soon cause performance problems in ERP software and data quality will suffer.

- Structured and organised data
- Ensuring database performance and processing speed

This solution is used by many leading Estonian companies, such as Premia, Liviko, Assa Abloy, Utilitas, Ramirent, Ehituse ABC, Klick Eesti, Elering, Viru Keemia Grupp, Kapitel, SOL Baltics, Salvest, Filter, Saaremaa Piimatööstus, E-Piim and others.

100 reports for free

The best way to learn about the possibilities of data warehousing is to test it out with the data of your company. To this end, we offer you the opportunity to use the data warehouse solution for two months free of charge, to see the possibilities and scope of reporting. You will have access to more than 100 standard reports covering most of the modules of your ERP solution (purchase, sales, inventory, payables, finance etc). If needed, you can also create your own reports. [Examples of standard reports](#).

Launching

1. A one hour meeting with our consultant, where we will identify the modules you need to test your business intelligence.
2. Installation by BCS Itera.
3. Training for users (up to 2h).

It is necessary to have a Microsoft Power BI licence. If you do not have it, we will help you get it.

Costs after the trial period

- BI4Dynamics license (from €200 per month).
- In addition, a Power BI Premium user license (approximately €20 per month per user).
- Database hosting, the price of which depends on the amount of data and the server host. Our database hosting service starts from €100 per month, provided that you have a Power BI Premium license.
- Database client-specific configurations, architecture changes, roles, translations, training (from 16h).
